

QUALITY POLICY

Quality is at the heart of Zentiva and foundation of our business success

At Zentiva we made it our mission to deliver high-quality and affordable medicines to the people who depend on them every day.

We make a difference in the lives of millions of people. We develop, produce, and serve our products and care about more than 100 million people, across more than 30 countries in compliance with regulatory requirements, company standards and values, which are built based on the principles of Professionalism, Teamwork and Respect for the work of others.

Every single person at Zentiva is responsible for product quality, and patient safety. We do things right first time and maintain the quality culture by following the Zentiva Quality System, applicable written procedures and processes, demonstrating quality-focused behaviours and adhering to all applicable rules and regulations.

We select our partners with care, monitoring them regularly to ensure that they meet the high-quality standards as we do.

Trust is the invaluable foundation of our company. Our products have earned the unwavering confidence of people, healthcare professionals and health authorities, and we consistently strive to preserve that trust.

Our future is based on sustainable growth that comes from continuous improvement of our ways of working.

Zentiva's Quality Policy is implemented through a comprehensive Quality Management System described in our Global Quality Manual.
